Green Roof and Living Walls Plant List

The plants listed below are some of the more commonly used species for green roof applications. Suitability of species is determined by the unique HABITAT of individual green roof projects.

N.A.T.S. Nursery Ltd. is always testing new plants for suitability in green roof and living wall applications for the Pacific Northwest. We are business and collaborative partners with BCIT's Centre for the Advancement of Green Roof Technology.

We look forward to discussing your green roof needs with you.

LiveRoof Module Pacific Northwest Plant Assemblage Options

Option A: **Sedum Cutting Blend** 300 cuttings per tray

EXAMPLES OF SPECIES USED: (subject to availability and lead time)

- Native** *Sedum divergens*, *Sedum oreganum*, *Sedum spathulifolium*, *Sedum stenopetalum*
- Compact** *Sedum cauticola*, *Sedum dasphyllum Major*, *Sedum floriferum 'Weihenstephaner Gold'*, *Sedum hybridum Immergrunchen*, *Sedum sicutense*, *Sedum spurium VooDoo*
- Vigorous** *Sedum acre Aureum*, *Sedum album*, *Sedum divergens*, *Sedum reflexum*, *Sedum rupestre Angelina*, *Sedum sexangulare*

The most cost-effective option. Excellent in very exposed and dry sites or where plant height is a consideration.

Option B: **Sedums, Bulbs and Grasses** 100 cuttings per tray, 4 bulbs, 10 plugs

EXAMPLES OF SPECIES USED: (subject to availability and lead time)

- Sedums** *Sedum acre*, *Sedum album*, *Sedum dasphyllum Major*, *Sedum floriferum 'Weihenstephaner Gold'*, *Sedum h. Immergrunchen*, *Sedum oreganum*, *Sedum rupestre Angelina*, *Sedum sexangulare*, *Sedum sicutense*, *Sedum spurium Royal Pink*
- Bulbs** Assorted seasonal bulbs, *Brodiaea spp.*, *Camassia quamash*
- Grasses** *Agrostis pallens*, *Allium spp.*, *Calamagrostis stricta spp.*, *Carex spp.*, *Festuca spp.*, *Koeleria spp.*

This option offers a greater plant diversity which helps to ensure the success and longevity of the green roof plant community. More visible sites will enjoy the presence of flowering species and their pollinators.

Option C - SUN **Wild West Mix -Sun** 8 bulbs and 15 plugs per tray

EXAMPLES OF SPECIES USED: (subject to availability and lead time)

- Perennials** *Achillea millefolium*, *Armeria maritima*, *Aster spp.*, *Castilleja miniata*, *Eriophyllum lanatum*, *Fragaria spp.*, *Heuchera spp.*, *Penstemon spp.*, *Sedum spp.*, *Sisyrinchium spp.*, *Solidago spp.*
- Grasses** *Agrostis pallens*, *Calamagrostis stricta*, *Carex spp.*, *Danthonia intermedia*, *Festuca spp.*, *Koeleria spp.*
- Bulbs** Assorted seasonal bulbs, *Allium spp.*, *Brodiaea spp.*, *Camassia quamash*, *Frittilaria lanceolata*

The most varied of the assemblages. For sites where biodiversity is key, or habitat corridors are being created. A visible roof will be aesthetically rich, with various shapes, colours and textures and good seasonal interest.

Option C - SHADE **Wild West Mix -Shade** 8 bulbs and 15 plugs per tray

EXAMPLES OF SPECIES USED: (subject to availability and lead time)

- Perennials** *Achlys triphylla*, *Aquilegia formosa*, *Campanula rotundifolia*, *Delphinium menziesii*, *Dicentra formosa*, *Fragaria spp.*, *Gaultheria shallon*, *Maianthemum dilatatum*, *Potentilla spp.*, *Tiarella trifoliata*, *Viola sempervirens*
- Ferns** *Blechnum spicant*, *Cryptogramma crista*, *Gymnocarpium dryopteris*, *Gymnocarpium dryopteris*, *Polystichum munitum*
- Bulbs** Assorted seasonal bulbs, *Allium spp.*, *Brodiaea spp.*, *Camassia quamash*, *Frittilaria lanceolata*

For the more unusual site which is moderate to heavily shaded, this mixture will create a truly "green" roof with high levels of biodiversity and seasonal interest.

Option D: **Designer Assemblage**

An alternate option is to design your own specific palette. This is useful where you are creating either a specific look with colours, shapes or textures or replicating a desired habitat. Our plant experts can help you select which species meet the requirements for your roof.

- SPECS:** The LiveRoof tray is 12" by 24" long and 4" deep with the soil elevators. The soil elevators are removed after the tray is locked into surrounding trays, for a seamless look. On the roof, the tray is laid upon the waterproof membrane and slip sheet. The borders are then completed with edging.
- The growing time varies according to the time of year that the project is being installed. Generally it is 12-18 weeks for staple species. Specialty mixes may take longer to propagate.

LiveRoof Installer Certification

Completion of this course is mandatory prior to confirming an order for LiveRoof modules. To guarantee success with your green roof, it is imperative that the modules be correctly installed on the site. The course takes approximately four hours and is provided by NATS Nursery Ltd. Call or email liveroof@natsnursery.com for more details.

Pricing/ Availability

Please call your sales representative for current pricing and availability of crops. For rapid service, fax or email your plant needs. Volume pricing is available.

Contract Orders

A non-refundable deposit of 25% is due at the time of order confirmation, and required so that production can begin.

Delayed/ Cancelled Orders

Holding fees will apply to orders that are delayed by the customer beyond their original ship date. Cancelled orders will be subject to a 25% restocking fee.

Delivery

N.A.T.S. Fleet: Shipping charges are based on distance and time required with the truck. Trucks run twice weekly to the I-5 corridor, weekly to the Greater Vancouver and Island areas in B.C.

Third Party Carrier: NATS ships weekly throughout the U.S. and internationally using professional carriers. Freight is charged at cost.

Claims

We take great care in packing your order to ensure it arrives as ordered and in good condition. We can only accept responsibility for product shipped by our own transport. Any claims against orders delivered by N.A.T.S. fleet should be submitted in writing within 48 hours of receipt of the order. If delivered by third party carrier, any claims, discrepancies or suspected damage should be immediately reported to the carrier's representative. Please notify N.A.T.S. as well, so that we may be of assistance where possible.

Returns

Due to biosecurity concerns and *P. ramorum* free certified nursery status, we are unable to accept returns of plant material to the nursery.

Payment and Terms

We accept payment by cash, debit card, company cheque, Visa or Mastercard.

For accounts with approved credit, payment terms are 30 days from the date of pick up or delivery. Interest on past due accounts is charged at 1.5% per month (18% annually). We welcome new accounts and ask that invoices be prepaid or C.O.D. until credit is approved.

Limited Warranty

Every care is taken to ensure that plants are true to name and type. Any plants proven to be untrue to name or type will, at our discretion, either be replaced free of charge or refunded at the original price. Our liability shall not in any event exceed the original purchase price of the material. No other warranty is given or implied.
